The American Academy of Pediatrics (AAP) Center of Excellence (CoE) on Social Media and Youth Mental Health is dedicated to creating a healthy digital ecosystem for children and adolescents.

Social media use starts during childhood and can play a significant role in the relationships and experiences that impact children and teens' growth, development and mental health.

The Center's work is guided by its co-Medical Directors, Megan Moreno, MD, MPH, MEd, FAAP and Jenny Radesky, MD, FAAP, who are pediatricians and experts in the field of youth development and media. Internally, Center Director Nicole Owings-Fonner leads a strong team of program, communications and mental health professionals.
